DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, between the Title and "Background Of The Invention", insert:

RELATED APPLICATIONS

This application is a continuation in part of U.S. Provisional application Serial No. 60/422,526, filed October. 31, 2002 and claims priority thereto under 35 U.S.C. 119e, and is included herein its entirely by reference.

(End of Amendment)

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e)

Art Unit: 2614

has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/08/2007 has been entered.

Allowable Subject Matter

3. Claims 1-3, 5-7, 9-14, and 29 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The Applicant's remarks filed on Nov. 08, 2007 were carefully reviewed. Specific on page 8 of the remarks wherein the Applicant stated as followings:

“...Donovan fails to teach or suggest a gateway through which a voice call is made, where the gateway comprises an interconnected node of the network and links the voice call therethrough to call source and recipient, for the entirety of the call. For example, the last sentence of the Donovan abstract teaches only a voice response unit (VRU) that establishes the call and then releases the call after connection.

Applicant's amended claims address the gateway that is a node of the network that links the source device and the recipient device over the network for the entire period of the call. Applicant's amended claim 29 refers the node as the "call node".

Donovan, therefore, teaches away from any possibility that a gateway could or would serve to count packet data numbers (or the like) during the entire call, because Donovan does not connect any gateway to link caller and recipient throughout the entire call. Donovan could not serve as Applicant's counter and network link between caller and recipient, because the Donovan VRU releases the call once connected between caller and recipient. Thus, the Donovan base reference teaches away...”

Since the independent claims 1, 12 and 29 had been amended with the above discussed features of the “gateway,” the claims 1, 12 and 29 are distinguished from the cited references, and allowed with the reasons set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
